

1 The table shows some information about the weights of 50 potatoes.

Weight (w grams)	Frequency
$10 < w \leq 20$	6
$20 < w \leq 30$	21
$30 < w \leq 40$	13
$40 < w \leq 50$	7
$50 < w \leq 60$	3

Iveta drew this frequency polygon for the information in the table.
The frequency polygon is **not** fully correct.

Write down **two** things that are wrong with the frequency polygon.

- 1 The first and the last point should not be joined
- 2 The first point is plotted at (15 , 8), it should be (15, 6)

The ratio of the number of Tom's stamps to the number of Adam's stamps is 3 : 7

Tom buys some stamps from Adam.

The ratio of the number of Tom's stamps to the number of Adam's stamps is now 3 : 5

How many stamps does Tom buy from Adam?

You must show all your working.

Stan is going to order the gifts.

Stan takes a sample of 50 people in the fitness club.
He asks each person to tell him the gift they would like.

The table shows information about his results.

Gift	Number of people
sports bag	17
gym towel	7
headphones	11
voucher	15

There are 700 people in the fitness club.

- (i) Work out how many sports bags Stan should order.

$$\frac{17}{50} = \frac{x}{100}$$

Amy also grows potatoes.

The box plot below shows information about the weights of Amy's potatoes.

(b) Compare the distribution of the weights of Megan's potatoes with the distribution of the weights of Amy's potatoes.
